APLICAÇÕES

We have developed a preliminary prototype and conducted trials with a small user group. We have received some initial feedback and made improvements based on it.

CONTEXTO

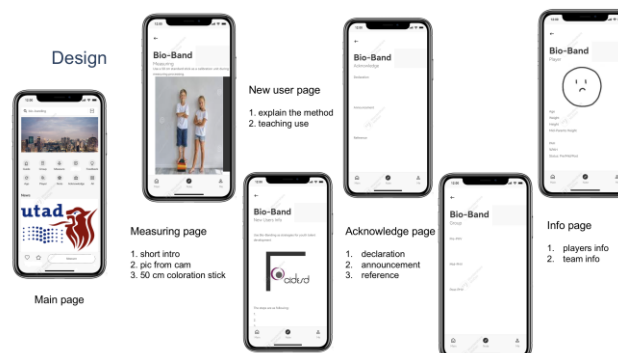

Maturo is a revolutionary platform that provides comprehensive, accurate, and real-time monitoring services for youth growth and development. This includes tracking and assessing mature data as well as personalized health and training recommendations. Maturo aims to improve the health of adolescents, optimize their physical training programs, and provide better health and sports advice for their future based on predictions.

The project addresses issues in the growth and development process of young people, such as the lack of comprehensive and accurate personal growth pattern information. It provides a convenient platform to help clients access sports and health knowledge, analyze their growth and development status, and provide corresponding solutions.

MATURO - Youth Growth and Development Monitoring System

DIREITOS DE PROPRIEDADE INDUSTRIAL

Maturo is the first platform to provide comprehensive, accurate, and real-time monitoring services for youth growth and development. Our idea is based on years of research and experience, and our team has rich expertise and experience in the fields of education, healthcare, and sports. We are in discussions with lawyers regarding patent protection for our innovations.
